Cleaning Rule

Nomatter which fabric your Flair lounge suite is made from, the same general care rules apply (with just a few fabric-specific exceptions*)

Follow these simple tips to keep your suite looking great and feeling comfortable for years to come.

Wipe spills immediately: Never let liquids sit. Use a damp cloth or sponge (not dripping wet), then dry the area with a towel.

Vacuum or dust regularly: Don't forget the folds and seams as that's where dust and smells can build up. Focus on the arms: These areas absorb sweat and food residue. Wipe them down often.

Keep away from heat and sunlight: Don't place your suite in direct sunlight or near heaters, as this can cause damage or fading.

Never use chemicals, detergents, dishwashing liquids, or household cleaners.

Avoid anything abrasive as it can scratch or dull the material.

Don't use products like hand sanitizer, hair products, nail polish, or Vaseline near your suite.

Stay away from any cleaner that contains alcohol or solvents.

Only use clean, warm water with a soft cloth. Harsh products can strip the material, dull the sheen, or cause cracking over time.

Corrected Grain Leather

Corrected grain leather is created by sanding or buffing the natural hide to remove imperfections. A consistent grain pattern is then embossed onto the surface.

Explore our collection of Corrected Grain Leathers, available in a rich palette of colours: Brown, Red, Black, Grey and Mushroom.

1. Durable and practical
2. Finished with a protective topcoat
3. Easy to clean and maintain

Fabric Specifications

Apart from the standard cleaning and maintenance guidelines above, we have some additional instructions that are specific to the different covering materials we offer. These tailored recommendations are designed to help you care for your Flair lounge suite based on its unique fabric or finish, ensuring it looks its best while extending its lifespan.

Here's how to keep your suite looking great, based on the material you choose:

Suede Fabric (Microfiber)

Our soft fabric range includes synthetic microfiber suede in colours like Mocha, Java, Americano, Espresso, and more. This fabric is stylish and plush, with a soft texture that adds warmth, but it requires gentle care to keep its appearance.

Leather Uppers

This is cost-effective combo of genuine and imitation leather where genuine leather is used on all high-contact areas (seat cushions, backrests, and arm fronts) and the rest is finished in matching leather-look material.

Leather Look (Embossed Polyester)

Leather Look (Embossed Polyester)

These are 100% polyester fabrics with embossed patterns that mimic natural leather grain. They're soft to the touch and easy to clean, and they are the ideal option for a leather look without the price tag.

Genuine Leathers

Choose between 100% corrected grain leathers, semi-aniline and buffed leathers from local and international suppliers. Our full leather suites are upholstered entirely in genuine leather. This type of leather is strong and long-lasting, but still needs care to stay soft and smooth.
